SKILLS

- Node.js, Typescript, Angular, Nest.js, TypeORM, AWS, Docker, MySQL, TDD, Git, Bash, JWT, Kubernetes
- PrimeNG, RxJS, gRPC, Twilio, Facebook messenger, AWS Polly, Jenkins, FFMPEG, React
- Working knowledge of Object-Oriented Programming concepts. SOLID and Design Patterns
- Computer Assembly and networking.

EXPERIENCE

Mumbai, INDIA

Mar 2022 - Present

Delivery Solutions

Associate Technical Lead (Remote)

- **Enterprise-Scale Performance Leader:** Architected high-performance microservices handling 800+ TPS while achieving a 73% performance boost and 34% cost reduction through innovative load-balancer engineering.
- **Strategic Technical Driver with Proven Delivery:** Led 4 epic-level initiatives delivering 100 issues across 20 major projects with measurable business impact, demonstrating exceptional execution velocity and stakeholder management in enterprise environments.
- **Production-Hardened Problem Solver:** Resolved 23 critical bugs including 5 high-priority production issues while maintaining 85% test coverage, with 14 zero-downtime production deployments.
- **Architecture Transformation Expert:** Transformed monolithic legacy systems into 40+ domain-based microservices achieving 48% performance improvement, demonstrating mastery of modern architecture patterns and ability to modernize technical debt.
- **Enterprise Integration Specialist:** Built sophisticated workflow automation for Fortune 500 healthcare logistics (McKesson, UPS) with SFTP, OAuth, and event-driven webhooks.
- **Security & Scalability Champion** Engineered multi-tenant security architecture with JWT validation, tenant guards, and request-scoped context management for enterprise-grade SaaS
- **Technical Depth Meets Product Mindset** Created reusable internal frameworks and comprehensive documentation with DDD patterns used across **6+ microservices**

Santa Clara, CA

Aug 2020 - Mar 2022

Irislogic

Programmer Analyst (Remote)

- Implemented, shipped, and operated over 40 microservices that can handle loads up to 100 QPS.
- Improved the validation from 10 minutes to 2 Minutes using AJV for CSVs to be inserted into DB.
- Coded several universal microservice using AWS (SQS, SNS, SES, serverless) and Nest.js consumed by 6 other microservices..
- Reduced support tickets by 70% for a large client by taking charge of reworking, and error handling, ensuring 100% error code mapping with appropriate HTTP codes and triggering Nest.js restful API exceptions for non-mapped error codes.
- Built the entire user management backend with MFA using Passport+JWT capable of handling 300 users at 1 go.
- Consolidated the view APIs end to end using the TypeORM feature delivering the product in 12 days.
- Devices CI/CD pipelines for 0 down time and 20X faster deployment and delivery
- Translated business logic to code bridging the gap between client and developer improving the timeline by 5 days.
- Restructured applications using Node.js clusters, Kubernetes for scaling, and 0 downtime

Mumbai, INDIA

Jan 2018 - Aug 2020

Pirates Alert

Software Engineer(Remote)

- Created an application for detecting/reporting pirated content online currently in use by 4 companies.
- The technologies used were: Node.js, Cypress, Python, Angular, React, Basic machine learning algorithms, FFMPEG, GCP, Jenkins, and Google Vision/Tesseract for image recognition.

Mumbai, INDIA

Jan 2017 - Dec 2017

Freelance

Software Developer/IT Engineer

- Developed websites, chat-bots, and models which could converse based on speech using HTML Canvas, Google speech recognition, and Python to generate the animated models.
- Reduced the cost by using AWS poly to generate speech from text and patch the same to the model
- Created a Phone Bot using Twilio and Node.js
- Created a Facebook messenger and WhatsApp Bot.

OPEN-SOURCE CONTRIBUTIONS

- Open Source Contribution- Made first contribution to **Nest.JS**
- **readline-promise** - node.js package

PROJECTS

- **Athena-Programming Language**
<https://github.com/BhargavMantha/athena-programming-language>. Started with this project to learn the concepts of compiler design, Abstract Syntax tree, Lexical, Grammar, SOLID design principles, and Design patterns applicable to any programming language.
- **WEB3-ETH transaction portal**
- **Thanos snap**
Javascript implementation of Thanos snap using Three.js

CERTIFICATIONS

- **Nest.js**
 1. **NestJS Zero to Hero - Modern TypeScript Back-end Development** - [Certificate Link](#)
 2. **Nest Official Course - NestJS Fundamentals** - [Certificate Link](#)
- **AWS**
 1. **[NEW] Amazon ECS & Fargate Master Class - Docker on AWS** - [Certificate Link](#)
- **Machine Learning and Deep Learning**
 1. **IIT-Delhi - Department of Electrical Engineering** [Certificate Link](#)
